

# COMMUNITY-LED INNOVATION PARTNERSHIP (CLIP)

## INDONESIA INNOVATION HUB

### Innovative Disaster-Safe Education

*Teater Inklusi, BonHargo, Pusat Pemberdayaan Disabilitas Mitra Sejahtera (PPDMS), PPDI Central Sulawesi*

Our innovators are combining interactive learning methods (board games, educative video, and outbound) and traditional knowledge (theater play) to enhance public understanding and capacity in inclusive disaster management.

### Community Resilience for Hydrometeorology Hazard

*Prima Gadung Youth Group, Artha Mandiri Food Barn, SHG Unggul Jiwa, Bolapapu Women, SHG Luhur Jiwo,*

Community-led innovators strengthen local food resilience through initiatives such as planting trees to prevent landslides, implementing grain-saving and lending systems, adapting rice cultivation to changing conditions, and bringing farm produce closer to home kitchens for easier access.

### Community Resilience in Waste Management and Climate Change Adaptation

*Petani Milenial Purwosari, Wanita Karya Women Farmer Group, Melati Women Farmer Group, Ngudi Makmur Farmer Group*

Local communities are feeling the impacts of climate change and are responding through adaptive innovations such as drip irrigation systems to conserve water, repurposing used water gallons and single-use plastics for fish farming and crop cultivation, and managing plastic and organic waste effectively.

### Innovative Products in Disaster Management

*FPRB Murtigading, Gempita, KSB Merapi Rescue, Pita Merah Jogja*

Communities can respond to humanitarian and emergency situations more efficiently and effectively through locally-led capacity and innovation. Our innovators have developed emergency mobile public kitchens, inclusive integrated shelter management system, and a healthcare access mobile application specifically for people living with HIV/AIDS.

The Community-Led Innovation Partnership (CLIP) supports locally developed solutions for humanitarian challenges in Guatemala, Indonesia, and the Philippines. In Indonesia, YAKKUM Emergency Unit (YEU) implements IDEAKSI, a CLIP project focused on innovative and inclusive disaster response solutions for at-risk groups, including people with disabilities and older people. This initiative is supported by Elrha, Start Network, ADRRN Tokyo Innovation Hub, and funded by the UK Foreign, Commonwealth, and Development Office (FCDO).
